
Unlabeled Bulk Packed Products for OEM Accounts

Poplar Wood Dowels and Squares:

The poplar dowels and squares we produce are machined to exact size from kiln dried material. We strive to hold the dimensions to plus or minus five thousandths of an inch. Poplar is a cream color hardwood. It offers superior quality characteristics for sanding, gluing, painting, staining, nailing and stapling. It is smooth and has a fine grain.

Oak Wood Dowels:

We produce our oak dowels from kiln dried material to the same tolerances as outlined above. American oak is the king of all hardwoods. It has a beautiful but coarse grain, is durable, very strong, stays straight and is a favorite in the furniture industry. Oak planes easily but is difficult to lathe turn for most applications. It glues satisfactorily but must be handled with care.

Grooved Dowel Pins:

For extra strength we produce all 1/4", 5/16", 3/8" and 7/16" dowel pins from kiln dried American oak. The 1/2" pins are birch. All pins are chamfered on both ends and packed in either small boxes or bulk warehouse cartons.

Craft Items and Other Turnings:

These items are produced from kiln dried materials and are mostly birch. Some high velocity items are offered in oak. These items are offered in small boxes or bulk warehouse cartons.

Ordering Information:

All lengths of dowels and squares are normally in ready stock. We pack in heavy-duty cartons and palletize each order. Please order in full carton quantities. Certain high velocity items are offered in shrink-wrapped bundles and shipped in full pallet lots. Such items are offered at reduced prices and must be ordered in full pallet quantities.

Grooved dowel pins, craft items and turnings are in ready stock in small boxes or bulk warehouse cartons. Please order in standard pack quantities.

Kiln Dried Domestic Poplar Wood Dowels In Full Carton Lots
